This is the FIRST literary production written and printed in Oregon. Much of the work is in day by day diary form, and, as Bancroft says (though we question this being now regarded as a defect), shows a too literal observation of the incidents of camp life in crossing the plans. However this may be, as the Pioneer production of the Territory, the work must ever occupy a distinct niche among the foundation items of Pacific Coast history. The only other copy of this work to be sold at auction fetched $29.00 in our rooms some years ago.

EXTREMELY RARE. The First Volume is a most difficult item to secure, old numbers fetching as high as $10.00 at Auction. The California Magazine is the FIRST Magazine published in California, succeeding to Ewer's "Pioneer," printed the year previous, and is of extreme importance for the Early History of the Far West, containing a number of Pioneer Narratives, relating to the Country, the Mines, Early Towns, etc., etc., which have appeared in no other place, or been republished in other form.

[illegible] California in 1853. *Plates.* 8vo, 157 pp. Keokuk: Privately Printed, 1905

One of the few Journals of the Overland kept by a woman, it forms a record of toils and hardships truly pathetic, and illy understood. In the Sierras, with only men about and no water near, this poor lady became a mother! "With no one near to help, comfort or relieve, God only knows the fear and agony of that dreadful time." There is, of course, much Indian material, as well as reminiscences of the Early days and life in California.

OF EXCESSIVE RARITY. For many years the leading book dealers of both this country and Europe had a carte blanche order to procure a copy of this work for the President of the Oregon Historical Society, Mr. F. V. Holman, of Portland; years of search for it proved entirely unavailing, and the hope of ever acquiring the work was given up, when a small dealer in the East discovered the copy now on the Coast, which is regarded as the greatest bibliographical prize in the whole field of Western America. A long account of the book and its discovery was printed in the local papers of Portland. Historically the knowledge gained by Ledyard during this Voyage on the Northwest Coast and among the Indians at Nootka, etc., showed him the amazing importance of the Region and led to many interviews with Jefferson regarding the Country, the necessity of its exploration, trade with the Natives, and acquisition to the U. S., these views so impressed Jefferson that he fell in with his schemes, and but for his untimely death, would have prosecuted the discoveries then, made some twenty years later by Lewis and Clark, under Jefferson's auspices.

The author was one of the first scientific Pioneers through a great part of the country explored. The preface states "In 1846 I left St. Louis with the intention of making a tour through Northern Mexico and Upper California, I visited as many mines as possible, kept tables, memoranda in relation to people, their number, industry, manners and previous history, etc., my intention being to gain information of a country that was but little known.

The author was stationed on the Pacific to await the outcome of the Oregon Boundary Negotiation and to "seize California" upon the first intelligence to "justify it." He spent the years 1844-5 and 6 along these shores, and his book is one of the few which describe the Country and Natives in detail, prior to the Gold Rush.

Apparently the first copy of this rare narrative to be sold by Auction, and the only copy we trace is in the James Library. The work is that of a Hunter and Trapper, who intersperses his memoirs with reminiscences of Indian Fighting and other hair-raising "amusements" of the Early Plains days.
